Towel length can be set to short 10", medium 12" and long 14" lengths. Dispenser can be set to exposed or hidden mode which determines whether a paper towel hangs down when in idle mode. Customizable sensor can be set to 4", 6" or 8". Dispenser includes a 3-1/2" (90mm) diameter stub roll feature. Paper advance button dispenses paper when pressed.

POWER REQUIREMENTS:

Dispenser is powered by 4 "D" size alkaline batteries (not furnished) or an external 6-volt AC to DC switching power supply. Power supply is an optional accessory: order Bobrick AC Adapter Kit Part No. 3974-57. (For non-U.S. compatible plugs, order Part No. 3974-58).

INSTALLATION:

Provide framed rough wall opening 13" wide x 16" high (345x 420mm). Minimum recessed depth required to finish face of wall is 4" (102mm). Allow clearance for construction features that may protrude into rough wall opening from opposite wall. Coordinate with mechanical engineer to avoid pipes, vents and conduits. If unit projects above top of wainscot, provide channel or other filler to eliminate gap between flange and finish face of wall. Unlock and open the door of the dispenser cabinet. Mount unit in wall opening with shims between framing and cabinet at all points indicated by an S, then secure with #8 x 1/2" (4.2 x 13mm) sheet metal screws. For above counter installation, the unit sensor must be installed 7.5" above the counter or any protrusion. Above counter installation is not permitted in the state of California.

Open battery cover at the front of the dispenser and install 4, "D" size alkaline batteries. Select sheet length and "Paper Saver" mode using the switches to the right of the batteries. Load paper towel using the instructions on the dispenser.

Electrical supply for use with 6-volt AC to DC power supply must be installed per applicable building codes.
